In 2014 Crawford Company expanded their footprint into the Dubuque marketplace. Crawford North was born of a vision to expand Crawford's long-standing commitment to quality and customer satisfaction.

Located on Highway 20, Crawford North offers HVAC Services, Fabrication, Welding & Laser Cutting services. Local employees who know the market work directly with customers from start to finish, insuring customer satisfaction.

From residential customers to large-scale manufacturers, Crawford North is positioned to provide the level of expertise and innovation that is the foundation of Crawford Company.

Crawford North serves the greater Dubuque, Iowa area with welded fabrication, laser cutting, and HVAC services for both residential and commercial projects. We provide solid solutions to our customer's unique applications from the initial design phase all the way to delivery.

Our Skilled HVAC Technicians and installers are trained to work on all makes and models of heating, ventilation, and air conditioning equipment. Each project has an assigned estimator, and shop and field member who stays with the job throughout the entire process to ensure a quick, efficient schedule.

Our Welded Fabrication Division is known for fabricating prototypes, producing parts, and building sub-assemblies for many industries and environments. Our craftsmen are knowledgeable in working with a wide range of materials to best fit the needs of the project. Our capabilities include a full range of fabrication applications on materials up to 3/4" plate.

Our Laser Cutting Division offers four versatile machines to perform precision cuts for mild steel, stainless steel, tool steel, aluminum and plastics.

Our Maintenance includes cleaning and check ins, in-depth analysis and repair, and after hour emergency service.

Crawford North is proud to continue our original values of customer service, a commitment to product quality, innovation, business integrity, and a high regard for individual contributions. Crawford began serving the Dubuque Region in July 2013 with field employees and moved into the current facility in the Fall of 2014.
